Across

- 2. Chemical symbol is K.[9]
- 5. Process of scratching the seed coat.[13]
- 6. Cauliflower vegetable is the unopened ____ of the plant.[3]
- 8. ____ rotation.[4]
- 9. Animal that makes air spaces in soil.[9]
- 10. Part of the plant that supports the branches and leaves.[4]
- 11. Chemical used to kill pests.[9]
- 15. Peas and beans are examples of this plant type.[6]
- 17. An ____ substance has a pH less than 7.[6]
- 20. Carrot vegetable is this part of the plant.[4]
- 21. Chemical added to acidic soil[4]
- 23. Process when seed grows into a small plant.[11]

Down

- 1. Crushed volcanic rock added to acidic soil.[8]
- 2. Chemical symbol is P.[10]
- 3. Nutrient required in large amounts.[13]
- 4. Chemical symbol is N.[8]
- 7. Gas used by plants is carbon ____.[7]
- 11. Measure of acidity or alkalinity.[2]
- 12. Elements needed by plants in very small amounts.[5]
- 13. Organisms that cause many plant diseases.[5]
- 14. Part of the plant that photosynthesises.[4]
- 16. Type of soil preferred by vegetables.[4]
- 18. Type of planting that benefits plants near each other.[9]
- 19. Another name for basic.[8]
- 22. Absorbed by roots.[5]
